PROFILE

Mobile Developer with experience in React Native, Flutter, and TypeScript, complemented by hands-on experience in C#, .NET, RESTful APIs, and SQL. Strong foundation in OOP and software design, with experience developing scalable solutions across mobile and backend platforms.

EMPLOYMENT HISTORY

Sep 2025 - Present	Software Specialist, LÖSEV (Foundation for Children with Leukemia) On-site As a Software Developer: - Developed and maintained cross-platform mobile applications using Flutter for iOS and Android. - Developed and integrated RESTful APIs and backend services with C#/.NET, contributing to system integration and business logic. - Built data migration tools and database solutions, working with SQL and local storage to support reliable data management.	Ankara, TURKEY
Feb 2024 - Sep 2025	Mobile App Developer, Kapsül Technology Platform On-site As a Mobile App Developer: - Developed an enterprise-level cross-platform mobile application using React Native, Expo, and TypeScript, supporting multiple user roles. - Implemented scalable state management and integrated RESTful APIs using Redux Toolkit and Redux Persist. - Contributed to application development across authentication, team management, and reporting workflows. - Explore the Kapsül TYS app: Google Play Store Link - App Store Link	Konya, TURKEY
Jul 2024 - Sept 2024	Computer Engineering Intern, Ministry of the Interior On-site As a Computer Engineering Intern: - Completed internship at Ministry of Interior, gaining experience with enterprise IT infrastructure, messaging systems (RabbitMQ, Kafka), and various database technologies (PostgreSQL, Redis, Neo4J, Elasticsearch) - Learned about cybersecurity practices, system optimization, and participated in anomaly detection projects within government systems architecture.	Ankara, TURKEY

On-site

As a Computer Engineering Intern:

- I gained hands-on experience in designing and developing software panels for flight simulators, working extensively with various database technologies such as MySQL. This experience allowed me to combine my software engineering skills with real-world applications in the aviation and simulation industry, focusing on performance, data management, and system reliability.

SKILLS & TOOLS	Flutter	C#	Firebase	SQL Server
	React Native	.NET	Git	PostgreSQL
	CSS	RESTful APIs	GitHub	SQLite
	Javascript	SQL	Figma	MongoDB
	Typescript	Entity Framework	Agile/Scrum	
	React.js	Node.js		

EDUCATION	Konya Food and Agriculture University
	Bachelor of Science in Computer Engineering (100% English Instruction)
Sept 2020 - Jul 2025	• GPA: 3.22/4.00

LANGUAGES	English - C1 (Advanced)	German A1 (Beginner)
-----------	-------------------------	----------------------

PROJECT	Team Management System
	Cross-platform team management mobile application developed with React Native, TypeScript, Redux, JWT, and Expo, featuring secure authentication and scalable application architecture.
	FlowPass
	Blockchain-based transport payment application built with React Native, integrating digital wallets, smart contracts, and decentralized identity.
	RouteAI
	AI-powered travel planning mobile application developed with React Native, Expo, Firebase, and Gemini AI, providing personalized travel recommendations.
	MIPS Assembly Simulator
	Web-based MIPS assembly simulator built with HTML, CSS, and JavaScript, supporting step-by-step execution and real-time register and memory visualization.

CERTIFICATE	Certified Graduate from Google Game and App Development Academy I completed an intensive 8-month training at the Game and Application Academy, gaining hands-on experience in game and app development. I also earned a Flutter mobile app development certificate.
